Hosted Events on Climate & Clean Energy Issues

- December 1, 2012
“**Solar Power: Putting It to Work in Coastal Georgia**” – Public forum held at the Coastal Georgia Center, Savannah.
- November 13, 2015
“**Using the Law to Protect Georgia’s Coast: Pipelines, Offshore Drilling, LNG and Climate Change.**”
A presentation in Savannah by Jessica Wentz, Associate Director of the Sabin Center for Climate Change Law, Columbia University.
- November 11, 2016
“**Wisdom to Survive: Climate-Change, Capitalism & Community**” – Savannah Screening of the Award-Winning Film, followed by a public discussion of its implications for coastal Georgia.
- June 17, 2017
“**Why neglecting nature threatens our prosperity**” – A presentation by Professor Geoffrey Heal, Columbia University.
- October 20, 2018
“**Climate Change and Coastal Georgia**” – Conference held at the Coastal Georgia Center, Savannah.
- Feb 23, 2019
“**The Green New Deal: Can Savannah prevent the worst damage of climate change?**” – Savannah public forum.

Collaborative Activities on Climate & Clean Energy Issues

- September 22, 2019
An estimated one-thousand people of all ages came to Savannah’s Forsyth Park to strengthen support for expedient, effective action on the climate crisis, in tribute to the Global Climate Strike. The Center initiated this collaboratively organized event, which greatly boosted public awareness of the urgency of global climate issues. This was not only the largest climate event ever held in coastal Georgia, but the best-attended environmental rally in the history of Georgia’s coast.
- November 2019 – March 2020
The Center actively collaborated in drafting and advocating a Clean Energy Resolution, paralleling similar initiatives in many other cities across Georgia and the U.S. The resolution, committing Savannah to using 100% clean energy by 2035, was unanimously adopted by the Savannah City Council on March 26, 2020. The city’s sustainability department is now developing a multi-faceted strategy to implement the resolution’s objectives.
- 2019 - Present
In keeping with the Center’s commitment to collaborative endeavors, our board and staff have been working with Savannah’s Climate Reality Project group to advance action on climate change and clean energy through a series of monthly meetings of volunteers comprising a diverse array of individuals sharing common priorities. Over the past year, the Center’s co-director has been serving as chair-person for the initiative.
